

1) Separate Panel for Marketing Head

- Marketing Head Buys raw material from seller and maintain bills of raw materials.
- Types of raw materials - M.S (Mild Steel) Sheet, Handel, HInges, Flap Disc, Gas Cylinder (CO2), welding taar, Back patti etc...
- Maintains how much raw material used, and how much raw material left.
- Raw material bought from which seller. the price and quantity of raw material including transportation.
- He also sells the final product.

2) Change Branch Names to HM1, HM2, HP1, & HP2

3) Add one more production stage after painting stage, there will be (Plywood fitting) stage.

4) Changes that i have found -

- Orders edit option not working
- Store management edit option not working
- In finances and invoices the action (eye) not working
- In employee attendance it can have (check out) button.
- In edit Employee it can have delete button we only have update button.
- In operator dashboard operator starts production session and after completing session when clicks end production session, it will opens box called end production session in this box we have Material consumption and add material button in this select materials options are not visible.
- In operators dashboard Quick actions are not working.
- In Menu, Settings option not working.
